

# Novaweld\* GT-500 Wedge

## Wedge Welding

- Fully Customizable Self-Propelled Wedge Welder for continuous field/factory sealing up to 30 fpm.
- Perfect for the installer who has tried everything commercially available and wants more.
- PLC & PID Temperature Controlled Operation
- Original Patented Wedge Welder. First unit sold in the late 80's. Tried and tested for High Reliability ... Made in USA

Industry Leader &  
Innovator of Heat  
Sealing Solutions

*During the past 20 years, customers have purchased the GT-500 used it for a variety of applications ... one GT-500 was designed to work with a laser guidance system to assure a straight seal over an extended distance. Another GT-500 included a turret system for multiple wedges, one standard, another with a split wedge. GT-500s have been designed with BPR and OPR wedge technologies.*
