

NOVAHEAT™

Hand Operated

Arbor Operated

Pneumatic Operated

NovaHeat Sealers are constant on heat sealers. Also known as Direct Contact Heat Sealers, Hot Die Sealers, Heated Platen Sealers, Hot Bar Sealers, etc. Whichever name you call it, NovaHeat Sealers are used to heat seal reinforcements, patching, bags, wire conduits, special designed forms and shapes. Quite versatile.

Applications commonly found for medical/pharmaceutical products, shade/awning reinforcement and hem end sealing, food/beverage, recreational products, custom packaging as well as practically every industry where thermoplastic materials need to be sealed or welded.

Portable & TableTop NovaHeat Sealers:

- Hand, Arbor or Pneumatically activated sealing die or platen
- Hot interchangeability. No need to first cool the die if/when die interchanging necessary.
- Interchangeable sealing head or dies.
- Custom shaped dies.
- PLC or Temperature Controlled.
- Automation-ready option.
- 120 VAC or 220/240 VAC.
- Easy to Use.
- Made in USA.
- 3-year Warranty.
- 24/7/365 NovaCare Support.
